ESN European Conference

Marcus Sander, CFA, Senior Investor Relations Manager
Frankfurt, 01 July 2016

Founded as a lead insurer by German corporates

Group structure

¹ Including employee shares and stake of Meiji Yasuda (below 5%)

History

1903	Foundation as 'Haftpflichtverband der deutschen Eisen- und Stahlindustrie' in Frankfurt
1919	Relocation to Hannover
1953	Companies of all industry sectors are able to contract insurance with HDI V.a.G.
1966	Foundation of Hannover Rückversicherungs AG
1991	Diversification into life insurance
1994	IPO of Hannover Rückversicherung AG
1998	Renaming of HDI Beteiligungs AG to Talanx AG
2001	Start transfer of business from HDI V.a.G. to individual Talanx subsidiaries
2006	Acquisition of Gerling insurance group by Talanx AG
2012	IPO of Talanx AG
2014	Listing at Warsaw Stock Exchange

Strong roots: originally founded by German corporate clients; HDI V.a.G still key shareholder

Four divisions with a strong portfolio of brands

▶ Integrated international insurance group following a multi-brand approach

International footprint and focussed growth strategy

International presence

- Total GWP: €31.8bn (2015)
- 2015 GWP: 49% in Primary Insurance (2014: 53%), 51% in Reinsurance (2014: 47%)
- Group wide presence in >150 countries
- ~21,900 employees in 2015

International strategy by divisions

Industrial Lines

- Local presence by own risk carriers, branches and partners create efficient network in >130 countries
- Key target growth regions: Latin America, Southeast Asia/India, Arabian Peninsula

Retail International

- Target regions: CEE (incl. Turkey) and Latin America
- # 2 insurer in Poland²
- # 5 motor insurer in Brazil²
- # 2 motor insurer in Chile²
- # 9 motor insurer in Mexico²

Reinsurance

- Global presence focussing on Western Europe, North- and South America as well as Asia
- ~5.000 customers in >150 countries

¹ By branches, agencies, risk carriers, representative offices

² Source: local regulatory authorities, Talanx AG

▶ Global network in Industrial Lines and Reinsurance – leading position in retail target markets

FY2015 – Target achievement

2015 Outlook RoI >3.0%

2015 Outlook GWP growth +1-3%

2015 Outlook RoE 7-8%

2015 Outlook Net income €600-650m⁴; pay-out ratio 35-45%

Note: Figures restated on the base of IAS8

¹ Currency-adjusted: 4.8%

² After adjustment for goodwill impairment in German Life business of €155m reported in Q2 2015

³ Approved by AGM on 11 May 2016

⁴ 2015 Outlook for Group net income was adjusted from „at least €700m“ to „€600-650m“ following the goodwill impairment reported in Q2 2015

- ▒ Dividend pay-out ratio
- ▒ Adjustment for goodwill impairment in German Life (€155m/Q2 2015)

Valuation – A special look at Primary Insurance

¹ In this analysis, Primary insurance also contains Corporate Operations and Consolidation

² 2016 earnings estimates based on the 2016 sell-side consensus collected by Talanx and by Hannover Re in May 2016. Talanx's stake in Hannover Re is 50.2%.

▶ Strikingly low implicit valuation of Primary Insurance

Valuation – Earnings contribution from Primary Insurance

Net income Primary Insurance¹

in €m

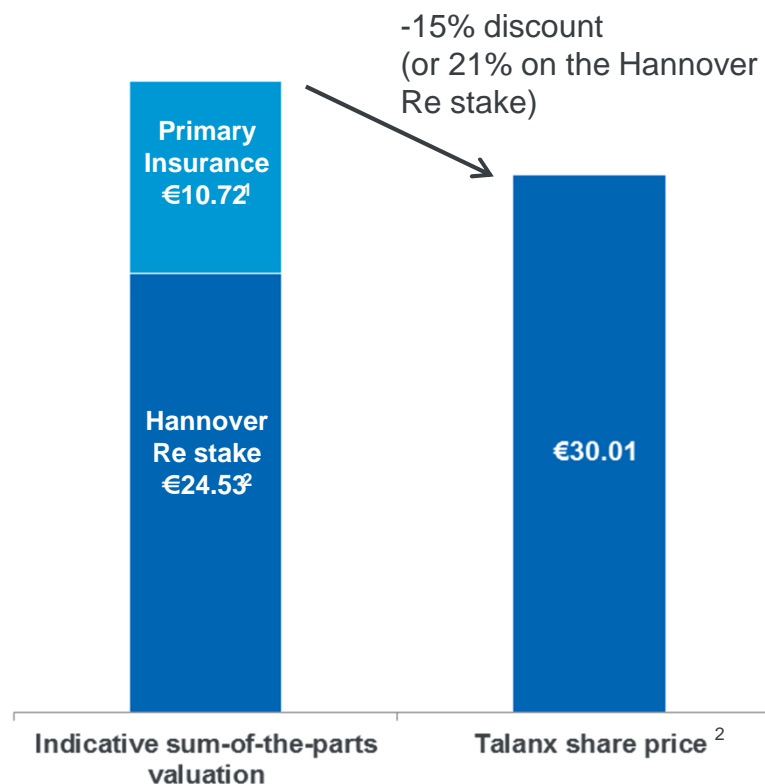

Comments

- Underlying profit contribution of Primary Insurance robust and recently improved
- „Balanced Book“ initiative focussing on underwriting results in Property, Marine and Fleet in Industrial Lines
- KuRS programme in Retail Germany addresses profitability
- Full goodwill impairment in German Life

¹ Incl. Corporate Operations and Consolidation; adjusted for balance-sheet related charges in Retail Germany (in particular, the €155m full goodwill impairment in FY2015 and further impairments of intangible assets in 2014) and for gains from the sale of Swiss Life shares

▶ Robust and recently improved underlying results from Primary Insurance

Valuation – Could it really be explained by a holding discount?

¹ Applying an average sector P/E of 10 on an assumed Primary Insurance net profit of €271m, according to 2016 earnings estimates based on the sell-side consensus by Talanx and by Hannover Re (April 2016). Talanx' stake in Hannover Re is 50.2%

² Xetra closing on 31 March 2016

Measures to secure and to boost value in the Group

- Disciplined resource-management: Generally no cash transfer into ailing Primary Insurance units
- Restrictive use of profit (and loss) sharing agreements in German Life
- Definition of standalone business-specific RoE targets by division that also drive remuneration
- Disposal of non-core activities (e.g. Bulgaria, Luxemburg, Ukraine, Liechtenstein, non-core German assets)
- Diversification benefits reflected in our internal model

 **Rigorous focus on value creation in the Group**

Average daily liquidity in the Talanx share

Source: Deutsche Börse, Bloomberg, own calculations

Comments

- In 2015, the Talanx share had an average daily trading volume of slightly below €10m – of which roughly €6m per day via Xetra
- In 2015, Talanx's free-float market cap stood at an average ~0.8% of the overall MDAX market cap
- Its respective share of traded volumes was higher at ~1.0%
- Following the 2015 increase in free-float to 21.0% given the placement of Meiji Yasuda shares, Talanx's position in the MDAX is well-founded (in April 2016: #34 in market cap and #42 in turnover)

Key achievements 2015

Industrial Lines: „Balanced Book“ – Status update

Property portfolio under review				
Total Portfolio in GWP	€1,370m			
Share of premium under review 2015	€300m			
Corresponding written capacity under review	€117bn			
	Premium	%	Capacity	%
thereof already finally negotiated	€303.7m	101.2% (of total)	€117.7bn	100.6% (of total)
- premium and capacity reduction due to reduced shares and cancelled accounts	€48.1m	15.8% (of negotiated)	€25.5bn	21.7% (of negotiated)
+ premium increase because of improved premium quality on remaining premium	€22.7m	8.9% (of remaining)	---	
- effect of additional reinsurance measures	€8.4m		€8.5bn	
= results	€269.9m		€83.7bn	
Premium to exposure for finally negotiated portfolio				
Relative improvement of portfolio quality i.r.o. finally negotiated premium to premium under review as end of December 2015	25.0%			

Comments

- „Balanced Book“ targets for a more symmetrically structured and adequately priced portfolio
- A €300m premium portfolio in Property has been identified and renegotiated successfully
- The premium to risk ratio improved by 17%, or even 25% when including positive effects of additional reinsurance measures
- Similar initiatives in Fleet and in Marine

 **Significant improvement of portfolio quality**

Industrial Lines – Profitabilisation measures in Germany

	Portfolios under review (GWP)	Results from negotiations (gross)	Portfolio improvement
Property¹		Negotiated €303.7m Effects on premium - 8.4% Capacity - 21.7%	 Premium to capacity ratio +25% ^{1,2}
Marine¹		Negotiated €71.8m Effects on premium -5.3% Capacity -26.9%	 Premium to capacity ratio +30% ¹
Motor³		Negotiated €121m Effects on premium -10.1% Effect on losses ⁴ ~ -14%	 Expected improvement in loss ratio by FY2016 ≥ 3%pts ⁵

■ Premium negotiated

¹ In respect of portfolio under review

³ German business only

⁵ Assuming constant claims statistic; FY2015 loss ratio: 84.4% (gross)

² Including effect of additional specific reinsurance measures

⁴ Expected, in terms of loss volume

Key achievements 2015

Retail Germany: Laying the foundation stone for “KuRS”

Life

- ✓ New capital efficient product portfolio developed and successfully launched with time to market less than a year (“**Modern classic**”)
- ✓ **Strong growth** in profitable biometric and credit life insurance business
- ✓ Implementation of real time **electronic risk assessment** for HDI disability insurance
- ✓ Successful implementation of digital corporate pension portal solution (“**HDI bAVnet**”), awarded with the price “digital lighthouse insurance in 2015” by German newspaper Süddeutsche Zeitung
- ✓ Further reduction of balance-sheet risks due to **write-down of full goodwill** (€155m) in 2015
- ✓ Decline in average life guarantee rate from 2.8 to 2.6% - average running yield 0.8%pt higher (2014: 0.7%pt)

Non-Life

- ✓ **Stabilisation of operations** via complete reduction of backlogs (from 800 thousand items to zero)
- ✓ Further **improvement of portfolio** quality, e.g. reduction of claims ratio
- ✓ **Going live and optimisation of hdi.de** application workflow for car insurance on 30 October 2015
- ✓ Initial approaches in relation to **process optimisation** and **increasing proportion of automatic processing** implemented

Overall

- ✓ **Investment and efficiency program “KuRS” launched in FY2015** to sustainably optimize Retail Germany and its competitive position and the aim of closing the expense gap of ~€240m in Retail Germany largely until 2020. Positive yearly impact on Group net income from 2017 onwards expected
- ✓ In 2015, the Retail Germany management board was realigned with a **strong and experienced leadership team** to ensure clear responsibility for lines of business

Retail	Industrial/Reinsurance				
Employee affinity business					

¹ Samples of clients/partners

Key Pillars of our risk management

1 Focus on insurance risk

Risk components of Talanx Group¹

Comments

- Total market risk stands at 45% of solvency capital requirements, which is comfortably below the 50% limit
- Self-set limit of 50% reflects the dedication to primarily focus on insurance risk
- Non-Life is the dominating insurance risk category, comprising premium and reserve risk, NatCat and counterparty default risk
- Equities ~1% of investments under own management
- GIIPS sovereign exposure 1.9% of total assets in FY2015 (FY 2014: 1.8%)

¹ Figures show approximate risk categorisation, in terms of solvency capital requirements, of the Talanx Group after minorities, after tax, post diversification effects as of 12/2014

² Refers to the combined effects from market developments on assets and liabilities

▶ Market risk sensitivity (limited to less than 50% of solvency capital requirement) is deliberately low

2 Diversification of business model leads to earnings resilience

Talanx Group net income

talanx.

¹ Net income of Talanx after minorities, after tax based on restated figures as shown in annual reports (2005–2015 according to IFRS)

² Adjusted on the basis of IAS 8

³ Top 20 European peers, each year measured by GWP; on group level; IFRS standards

Source: Bloomberg, annual reports

▶ Robust cycle resilience due to diversification of segments

3 TERM (Talanx Enterprise Risk Model) 2015 – Capitalisation perspectives

Policyholder & Debt investor View (BOF CAR)

253% ✓
(2014: 299%)

Limit \geq 200 %

- Basic Own Funds (including hybrids and surplus funds as well as non-controlling interests)
- Risk calculated with the full internal model

- with haircut ↓
- operational risk modeled with standard formula ↓
- HDI solo-funds ↑

Solvency II Ratio

171% ✓
(2014: 182%)

Target corridor 150%-200%

- Eligible Own Funds, i.e. Basic Own Funds (including hybrids and surplus funds as well as non-controlling interests) with haircut
- Operational risk modeled with standard formula, („partial internal model“)
- For the Solvency II perspective, the HDI V.a.G. as ultimate parent is the addressee of the regulatory framework

► Comfortable capital position from all angles

Summary - Investment highlights

Global insurance group with leading market positions and strong German roots

Leading and successful B2B insurer

Value creation through group-wide synergies

New profitability measures implemented in Industrial Lines and Retail Germany

Dedication to focus on insurance rather than market risks

Commitment to continuously fulfill a „AA“ capital requirement by Standard & Poor's

Dedication to pay out 35-45% of IFRS earnings to shareholders

- Q1 2016 -

I Q1 2016 underpins recently increased bottom-line target for FY2016

▶ Q1 2016 Group net income of €222m fully in line with FY2016 Group net income outlook of ~€750m

▶ Adjusting for last year's "special effect" in Life/Health Reinsurance (~€19m after taxes and minorities), quarterly performance roughly in line with previous strong Q1

▶ All Non-Life segments remained within their Q1 2016 large loss budgets. Combined ratio on Group level improved to 96.3% (Q1 2015: 96.5%)

▶ Over the first three months, shareholders' equity increased by ~€250m to €8,532m or €33.75 per share (31 Dec. 2015: €32.76). NAV up to €29.64 per share (FY 2015: €28.66)

▶ In parallel to today's reporting, risk management reports for FY2015 have been published. The Solvency II Ratio stands at a good 171 (FY 2014: 182) percent. Based on Basic Own Funds, Talanx's capitalisation was 253 (299) percent

I Q1 2016 results – Key financials

Summary of Q1 2016

€m, IFRS	Q1 2016	Q1 2015	Change
Gross written premium	8,995	9,440	(5%)
Net premium earned	6,266	6,367	(2%)
Net underwriting result	(422)	(389)	+9%
Net investment income	1,022	996	+3%
Operating result (EBIT)	573	643	(11%)
Net income after minorities	222	251	(11%)
Key ratios	Q1 2016	Q1 2015	Change
Combined ratio non-life insurance and reinsurance	96.3%	96.5%	(0.2%)pts
Return on investment	3.7%	3.6%	0.1%pts
Balance sheet	Q1 2016	FY2015	Change
Investments under own management	101,913	100,777	+1%
Goodwill	1,039	1,037	+0%
Total assets	154,779	152,760	+1%
Technical provisions	108,686	106,831	+2%
Total shareholders' equity	13,826	13,431	+3%
Shareholders' equity	8,532	8,282	+3%

Comments

- GWP is down by 4.7% y/y, due to currency effects (curr.-adj.: -3.0%) and the premium decline in Retail Germany (Life) and Non-Life Reinsurance. Industrial Lines, Retail International and L/H Reinsurance with underlying growth
- Industrial Lines and Non-Life Reinsurance with improved underwriting result. Decline in net underwriting result is mainly due to higher RfB contribution in Retail Germany (“ZZR”), following higher realised investment gains
- Group combined ratio improved by 0.2%pts y/y to 96.3%. All segments remained within their large loss budgets for the quarter
- Increase in investment result is mainly due to a ~€107m higher extraordinary investment result, mainly financing the ZZR allocation. Ordinary investment result down by ~€60m mainly due to the negative base effect from the one-off payment in L/H Reinsurance in Q1 2015 (~€39m)
- Decline in net income can be fully explained by the one-off effect mentioned above and a negative impact from currency effects in the “other result”
- Shareholders' equity increased ytd to €8,532m, or €3375 per share (FY2015: €32.76). 2015 Solvency II ratio slightly down by 6% to 171% (FY2014: 182%)

 **Improvement in Group combined ratio – adjusting for base effects, Group net income is in line with strong Q1 2015**

I Large losses¹ in Q1 2016

€m, net		Primary insurance	Reinsurance	Talanx Group
Earthquake, Taiwan	February 2016	3.3	15.6	18.9
Total Nat Cat		3.3	15.6	18.9
Fire/Property		63.8	39.9	103.7
Total other large losses		63.8	39.9	103.7
Total large losses		67.1	55.5	122.5
Impact on Combined Ratio (incurred)		4.4%pts	2.8%pts	3.5%pts
Total large losses Q1 2015		93.5	62.0	155.5
Impact on Combined Ratio (incurred) Q1 2015		6.2%pts	3.3%pts	4.6%pts

¹ Definition „large loss“: in excess of €10m gross in either Primary Insurance or Reinsurance

Note: Q1 2016 Primary Insurance large losses (net) are split as follows: Industrial Lines: €67m; Retail Germany: €0; Retail International: €0m, Group Functions: €0m; from FY2016 onwards, table includes large losses from Industrial Liability line, booked in the respective FY. The latter also explains the stated increase in the large loss budget for Primary Insurance by €10m for FY2016.

- Group Q1 2016 large loss burden of €123m (Q1 2015: €156m) – below the Group’s Q1 2016 large loss budget of €264m
- Q1 2016 net burden of €67m in Primary and €56m in Reinsurance – mainly due to man-made large losses; NatCat large loss of €19m from Taiwan earthquake
- Reinsurance well below its Q1 2016 large loss budget of €189m; Primary also below its pro-rata large loss budget of €75m

Combined ratios

Development of net combined ratio¹

Combined ratio¹ by segment/selected carrier

	Q1 2016	Q1 2015	FY2015
Industrial Lines	97.6%	98.9%	99.2%
Retail Germany	103.8%	100.5%	99.3%
Retail International	96.2%	94.6%	96.3%
HDI Seguros S.A., Brazil	101.6%	99.2%	99.3%
HDI Seguros S.A., Mexico	92.0%	90.4%	93.2%
TUiR Warta S.A., Poland	95.8%	94.7%	96.4%
TU Europa S.A., Poland	81.5%	83.2%	84.6%
HDI Sigorta A.Ş., Turkey	102.5%	102.7%	102.5%
HDI Assicurazioni S.p.A., Italy	96.4%	91.1%	95.4%
HDI Seguros S.A., Chile ²	90.5%	n/m	n/m
Non-Life Reinsurance	94.7%	95.9%	94.5%

¹ Incl. net interest income on funds withheld and contract deposits

² Incl. Magallanes Generales; merged with HDI Seguros S.A. on 1 April 2016

Apart from Retail Germany, combined ratios in all non-life segments below the 100% level

II Segments – Industrial Lines

P&L for Industrial Lines

€m, IFRS	Q1 2016	Q1 2015	Δ
Gross written premium	1,921	1,889	+2%
Net premium earned	537	518	+4%
Net underwriting result	13	6	+141%
Net investment income	50	53	(6%)
Operating result (EBIT)	74	72	+3%
Group net income	48	47	+3%
Return on investment (annualised)	2.6%	2.8%	(0.2%)pts

Combined ratio¹

¹Incl. net interest income on funds withheld and contract deposits

Comments

- Q1 2016 GWP up 1.7% y/y, dampened by currency effects (curr.-adj.:+2.5%). Growth was mainly driven by international markets, including new business units, e.g. in Brazil. Some dampening effect from profitabilisation measures, namely “Balanced Book”
- Retention rate was up (Q1 2016: 55.5%; Q1 2015: 50.4%), mainly in Liability lines. Reinstatement premiums remained broadly unchanged (Q1 2016: ~€12m)
- Q1 2016 combined ratio improved mainly due to lower large losses and despite prudential reserving as well as a higher expense ratio from international growth
- Decline in net investment result mainly due to the low interest rate environment; no significant extraordinary investment gains
- Net income slightly up on the back of the improved underwriting result

Improvement in net underwriting result leads to higher EBIT and bottom-line contribution

II Segments – Retail Germany

P&L for Retail Germany

€m, IFRS	Q1 2016	Q1 2015	Δ
Gross written premium	1,904	2,135	(11%)
of which Life	1,155	1,373	(16%)
of which Non-Life	749	762	(2%)
Net premium earned	1,217	1,448	(16%)
Net underwriting result	(478)	(392)	+22%
of which Life	(465)	(390)	+19%
of which Non-Life	(13)	(2)	+550%
Net investment income	535	445	+20%
Operating result (EBIT)	47	57	(18%)
Group net income	29	35	(17%)
Return on investment (annualised)	4.5%	3.8%	+0.7%pts

Combined ratio¹

¹Incl. net interest income on funds withheld and contract deposits

KuRS investments largely explain EBIT decline

Comments

- Decline in Q1 2016 GWP in Life predominantly due to a base effect. Q1 2015 saw an overlap from strong FY2014 year-end business. Premium trend consistent with the targeted phase-out of classical and single-premium business
- Slight decline in Non-Life GWP particularly in Motor and Homeowner business
- In Q1 2016, costs for efficiency program “KuRS” sum up to €10m, impacting Q1 2016 EBIT by ~€8m. Negative impact of ~2.3%pts on combined ratio (0.5% pts on Q1 2016 loss ratio, 1.8%pts on cost ratio). Adjusting for impact from KuRS, Q1 2016 combined ratio was 101.5% (reported: 103.8%)
- Decline in EBIT largely explained by investments for KuRS program
- Increase in investment result due to higher extraordinary result, mainly to finance ZZR contribution, while ordinary investment broadly unchanged. Q1 2016 ZZR allocation – according to HGB – of €168m (Q1 2015: €109m). Total ZZR stock reached €1.73bn in Q1 2016, expected to rise to €2.2bn until year-end 2016

II Segments – Retail International

P&L for Retail International

€m, IFRS	Q1 2016	Q1 2015	Change
Gross written premium	1,148	1,206	(5%)
of which Life	390	384	+1%
of which Non-Life	759	822	(8%)
Net premium earned	986	960	+3%
Net underwriting result	8	8	+6%
of which Life	(16)	(26)	(37%)
of which Non-Life	25	34	(27%)
Net investment income	80	79	+1%
Operating result (EBIT)	61	56	+9%
Group net income	36	33	+9%
Return on investment (annualised)	4.0%	4.0%	(0.0%)pts

Combined ratio¹

¹Incl. net interest income on funds withheld and contract deposits

EBIT improvement despite significant currency headwind and impact from asset tax in Poland

Comments

- Q1 2016 GWP down by 4.8% y/y due to currency effects predominantly from Brazil and Poland (currency-adj.: +3.5%), mainly impacting the Non-Life business
- On a currency-adjusted level, GWP in Non-Life grew by 3.5% y/y, backed by double-digit local growth rates in Mexico, Chile and Turkey – and a high single-digit local growth rate in Brazil
- Combined ratio up to 96.2% (Q1 2015: 94.6%), mainly as currency depreciation (i.e. in Brazil) led to increased costs for spare parts in Motor, resulting in a higher loss ratio. Cost ratio slightly down to 31.2% (Q1 2015: 31.4%)
- Despite the impact from currency depreciation and a ~€4m asset tax charge in Poland, Q1 2016 EBIT grew by 9.3% to €61m (Q1 2015: €56m)
- Turkey continued its positive trend, contributing €1.4m to segment EBIT (Q1 2015: €0.9m). Strong contribution from Chile²: €69m GWP; €4.6m EBIT

² Consolidated from 13 Feb 2015; “as-if” numbers for HDI Seguros S.A after merger (1 April 2016) with Magallanes Generales; total Chile Group: €78m GWP; €5.3m EBIT

II Segments – Non-Life Reinsurance

P&L for Non-Life Reinsurance

€m, IFRS	Q1 2016	Q1 2015	Change
Gross written premium	2,502	2,617	(4%)
Net premium earned	1,961	1,882	+4%
Net underwriting result	100	73	+37%
Net investment income	213	199	+7%
Operating result (EBIT)	310	279	+11%
Group net income	104	87	+20%
Return on investment (annualised)	2.8%	2.6%	+0.2%pts

Comments

- Q1 2016 GWP declined by 4.4% y/y (adjusted for currency effects: -3.7%); growth mainly from US, reduced volume from China motor business. Net premium grew currency-adj. by +5.2%
- Major losses of €55m (2.8% of net premium earned) well below budget of €189m for Q1 2016
- Conservative reserving policy unchanged, reserve run-off unremarkable
- Ordinary investment income in line with expectation
- Other income mainly improved due to positive currency effects
- Q1 2016 EBIT margin² of 15.8% (Q1 2015: 14.8%) well above target

Combined ratio¹

¹Incl. net interest income on funds withheld and contract deposits

² EBIT margins reflect a Talanx Group view

Favourable underwriting result in a competitive environment

II Segments – Life/Health Reinsurance

P&L for Life/Health Reinsurance

€m, IFRS	Q1 2016	Q1 2015	Change
Gross written premium	1,761	1,783	(1%)
Net premium earned	1,581	1,550	+2%
Net underwriting result	(68)	(85)	n/m
Net investment income	157	219	(28%)
Operating result (EBIT)	103	176	(41%)
Group net income	38	66	(42%)
Return on investment	3.6%	6.4%	(2.8%)pts

EBIT (€m)

¹ EBIT margin reflects a Talanx Group view

EBIT decreased due to positive one-off and currency gains in Q1 2015

Comments

- Q1 2016 GWP slightly down up by 1.2%; adjusted for currency effects: +0.3%, mainly from UK Longevity BATs, reduced volume from Australia
- Net premium earned grew by 3.6% on currency-adjusted basis
- Favourable underwriting result reflects underlying profitability
- Ordinary investment income in line with expectation (Q1 2015 affected by positive one-off of €39m)
- Decreased “other income and expenses” due to significantly reduced positive currency effects
- Q1 2016 EBIT margin¹ of 6.5% (Q1 2015: 11.3%) for the segment, meeting EBIT targets for all business divisions

Net investment income

Net investment income Talanx Group

€m, IFRS	Q1 2016	Q1 2015	Change
Ordinary investment income	783	843	(7%)
thereof current investment income from interest	690	729	(5%)
thereof profit/loss from shares in associated companies	2	4	(66%)
Realised net gains/losses on investments	221	176	+25%
Write-ups/write-downs on investments	(40)	(75)	(47%)
Unrealised net gains/losses on investments	31	5	+549%
Investment expenses	(55)	(50)	+11%
Income from investments under own management	941	899	+5%
Income from investment contracts	2	2	+9%
Interest income on funds withheld and contract deposits	79	95	(16%)
Total	1,022	996	+3%

Comments

- Ordinary investment income down due to the decline in interest income and the negative base effect from the one-off payment following a withdrawal from a US-transaction (~€39m) in Life/Health Reinsurance in Q1 2015
- Realised investment net gains of €221m in Q1 2016 include higher realised gains in Retail Germany to finance ZZR (allocation according to German GAAP in Q1 2016: €168m vs. Q1 2015: €109m) and clean-up of private equity portfolio in Reinsurance
- Lower writedowns on investments in Q1 2016 y/y mainly due to a base effect from Q1 2015, which had been impacted by a 50% impairment of the bond position in Heta Asset Resolution (mid double-digit €m amount)
- ROI of 3.7% (Q1 2015: 3.6%) – well above the FY2016 outlook of “at least 3.0%“
- ModCo derivatives: €-1m (Q1 2015: €0m); no impact from inflation swaps as these have been terminated in FY2015 (Q1 2015: €-15m)

Net investment income increased - Q1 2016 ROI reached 3.7%

Equity and capitalisation – Our equity base

Capital breakdown (€bn)

Comments

- Compared to the end of FY2015, shareholders' equity increased by ~€250m to €8,532 million at the end of Q1 2016, predominantly driven by the net income; limited net effect from lower interest rates and currencies
- Book value per share stood at €33.75 compared to €34.60 in Q1 2015 and €32.76 in FY 2015, while NAV (excl. goodwill) per share was €29.64 (Q1 2015: €29.69, FY2015: €28.66)
- Neither book value per share nor NAV contain off-balance sheet reserves. These amounted to €449m (see next page) or €1.78 per share (shareholder share only). This added up to an adjusted book value of €35.53 per share and an NAV (excluding goodwill) of €31.42
- In June 2015, three hybrid bonds in the Group were paid back earlier, bringing subordinated liabilities down compared to Q1 2015

Shareholders' equity up by ~€250m compared to end of December 2015

Equity and capitalisation – Unrealised gains

Unrealised gains and losses (off and on balance sheet) as of 31 March 2016 (€m)

Δ market value vs. book value

Off-balance sheet reserves of ~€5.8bn – about €449m (€1.78 per share) attributable to shareholders (net of policyholders, taxes & minorities)

Equity and capitalisation – Contribution to change in equity

In €m

Comments

- At the end of March 2016, shareholders' equity stood at €8,532m or €33.75 per share
- This was above the level at the end of FY2015 (€8,282m or €32.76 per share) predominantly driven by the Q1 2016 Group net income, while the impact from OCI movement was very limited

Shareholders' equity up to €8,532m or €33.75 per share

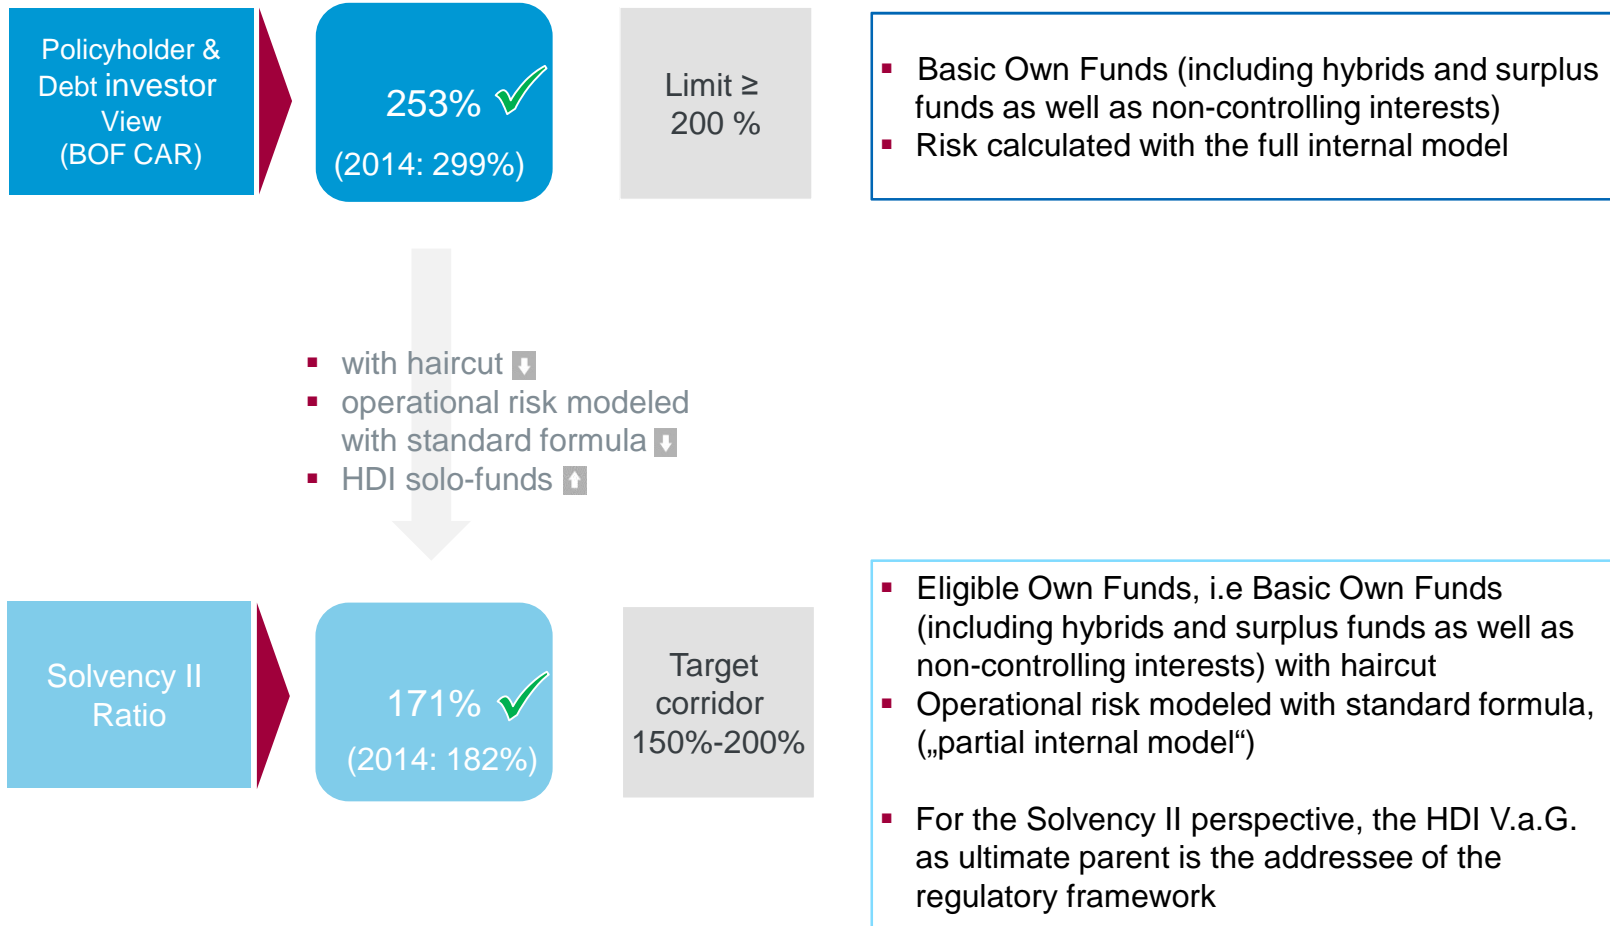

IV

Risk Management Reports 2015 - Essentials

- ▶ **TERM (Talanx Enterprise Risk Model) approved as Group Internal Model by BaFin end of 2015**
- ▶ **While model uncertainty has further declined, the Capital Adequacy Ratios demonstrate a solid capitalisation from all perspectives – in absolute terms and in a sector comparison**
- ▶ **Based on the concept of Basic Own Funds (Policyholder & Debt investor View), the CAR stands at 253% (2014: 299%, both 99.5% confidence level). Market risks of 44% remain well below the 50% strategic limit. Solvency II related CAR at a solid 171% (2014: 182%)**
- ▶ **Increase in Group MCEV by 7.5% y/y to €3,339m. The rise in MCEV is primarily driven by an increase in the German MCEV from €644m to €939m**
- ▶ **The MCEV for the international retail business was largely stable**
- ▶ **The New Business Value developed positively for the Primary Insurance and excellently for Reinsurance**

Note: In the entire presentation, calculations are based on a 99.5% confidence level, including volatility adjustments yet without the effect of applicable transitionals

IV TERM 2015 – Capitalisation perspectives

► Comfortable capital position from all angles

V Outlook for Talanx Group 2016¹

Gross written premium	stable
Return on investment	≥3.0%
Group net income	~€750m
Return on equity	>8.5%
Dividend payout ratio	35-45% target range

¹ The targets are based on a large loss budget of €300m in Primary Insurance, of which €270m in Industrial Lines. From FY2016 onwards, table includes large losses from Industrial Liability line, booked in the respective FY. The large loss budget in Reinsurance stands at €825m (2015: €690m)

▶ **Targets are subject to no large losses exceeding budget (cat), no turbulences on capital markets (capital), and no material currency fluctuations (currency)**

A Mid-term Target Matrix

Segments	Key figures	Strategic targets (2015 - 2019)	
Group	Gross premium growth ¹	3 - 5%	
	Return on equity	≥ 750 bps above risk free ²	
	Group net income growth	mid single-digit percentage growth rate	
	Dividend payout ratio	35 - 45%	
	Return on investment	≥ risk free + (150 to 200) bps ²	
Primary Insurance	Industrial Lines	Gross premium growth ¹	3 - 5%
		Retention rate	60 - 65%
	Retail Germany	Gross premium growth	≥ 0%
	Retail International	Gross premium growth ¹	≥ 10%
		Combined ratio ³	~ 96%
		EBIT margin ⁴	~ 6%
Non-Life Reinsurance⁷	Gross premium growth ⁶	3 - 5%	
	Combined ratio ³	≤ 96%	
	EBIT margin ⁴	≥ 10%	
Life & Health Reinsurance⁷	Gross premium growth ¹	5 - 7%	
	Average value of New Business (VNB) after minorities ⁵	> € 90m	
	EBIT margin ⁴ financing and longevity business	≥ 2%	
	EBIT margin ⁴ mortality and health business	≥ 6%	

¹ Organic growth only; currency-neutral

² Risk-free rate is defined as the 5-year rolling average of the 10-year German government bond yield

³ Talanx definition: incl. net interest income on funds withheld and contract deposits

⁴ EBIT/net premium earned, ⁵ Reflects Hannover Re target of at least €180m

⁶ Average throughout the cycle; currency-neutral, ⁷ Targets reflect Hannover Re's targets for 2015-2017 strategy cycle

Note: growth targets are based on 2014 results. Growth rates, combined ratios and EBIT margins are average annual targets

¹ investment under own management

- Risk Management Reports 2015 -

A TERM 2015 - Result History (Policyholder & Debt investor View, based on Basic Own Funds)

Basic Own Funds (€bn)¹

Solvency Capital Required (€bn)¹

Capital Adequacy Ratio (CAR)¹

Comments

- Basic Own Funds (including hybrids and surplus funds as well as non-controlling interests)
- The respective CAR (99.5% confidence level) stands at a comfortable 253%
- The decline from last year's level of 299% reflects both the effects of the market environment as well as the effects of model changes. The latter solely refer to the Primary Life business
- This concept is used for risk budgeting and steering at Talanx as it best reflects the economic capital position of the Group

¹ Including non-controlling interests
² Re-calculation of 2014 results with pre-approval model changes

▶ Strong capitalisation despite dampening effects from markets and pre-approval model changes

A TERM 2015 - Result History (Solvency II View)

Eligible Own Funds (€bn)¹

Solvency Capital Required (€bn)¹

Solvency II Ratio¹

Comments

- Eligible Own Funds, i.e. Basic Own Funds (including hybrids and surplus funds as well as minority interests) with haircut on Talanx's minority holdings
- Compared to the Policyholder & Debt investor View (BOF CAR), the higher level of the SCR reflects the measurement of operational risks by means of the standard formula
- Due to the technical regulatory framework for the regulatory view (haircut) the decrease of SII-CAR is dampened compared to the Policyholder & Debt investor View (BOF CAR)

Note: In the entire presentation, calculations are based on a 99.5% confidence level, including volatility adjustments yet without the effect of applicable transitionals

¹ Including non-controlling interests

² Re-calculation of 2014 results with pre-approval model changes

Comfortable regulatory capitalisation despite the effects from markets and from pre-approval model changes

A TERM 2015 – Analysis of Change

- ### Model Change Effect
- Slight decrease of Own Funds for Primary Life, due to model changes (moderately negative impact)
 - Higher risk margins (moderately negative impact)

- ### Economic Effect
- Call of hybrids (detrimental impact)
 - Interest rate development (favourable impact)
 - Credit spread widening (moderately negative impact)
 - Retention of profits (favourable impact)
 - Magallanes goodwill (detrimental impact)
 - Higher risk margins (moderately negative impact)

- ### Model Change Effect
- Credit risk (detrimental impact)
 - Interest rate (detrimental impact)

- ### Economic Effect
- Currency-adjusted (underlying) growth (detrimental impact)
 - Currencies (USD) (moderately negative impact)
 - De-risking in the German Life portfolio (detrimental impact)
 - Overall increase of exposures to credit risk (moderately negative impact)
 - Increased credit risk lowering diversification (moderately negative impact)
 - Credit spread widening (moderately negative impact)

- detrimental impact (red square)
- moderately negative impact (yellow square)
- favourable impact (green square)

¹ Including non-controlling interests | ² Pre-approval

Few model changes further increasing model robustness

A TERM 2015 – Own Funds, SCR and CAR by Division

Own Funds, SCR and CAR by Division

¹ Economic View based on Basic Own Funds (including hybrids, surplus funds and non-controlling interests)

² approximated IFRS equity without consideration of consolidation effects

³ Solvency capital requirement; determined according to 99.5% security level, economic view based on Basic Own Funds, including non-controlling interests

⁴ In the internal model view, the CAR of the German Life carriers stand at above 140% overall, for each individually above 100%

 **All Divisions well capitalised**

A Solvency capital requirement split into components

Risk components of Talanx Group¹

(as of 31 December 2015, €bn)

¹ Figures show risk categorisation of the Talanx Group including non-controlling interests. Solvency capital requirement determined according to 99.5% security level for the economic view, based on Basic Own Funds (BOF)

High diversification between risk categories – market risk remains still below 50% threshold

A TERM 2015 – From IFRS equity to Eligible Own Funds

Talanx level	HDI level	Terminology
in €m		
IFRS total equity	13,431	
- Non-controlling interests	-5,149	
= IFRS shareholders' equity	8,282	
- Goodwill & Intangible assets	-1,936	
+ Valuation adjustments	1,988	
= Shareholders' net assets	8,334	
+ Non-controlling interests (incl. Valuation adjustments)	6,590	
+ Surplus funds (before minorities)	1,581	
= Excess of Assets over Liabilities (EAoL)	16,505	
+ Subordinated liabilities (before minorities)	2,165	
- Own shares	0	
- Foreseeable dividends & distributions	-677	
= Basic Own Funds (Talanx) before deductions	17,993	<div style="border: 1px solid black; border-radius: 50%; padding: 5px; display: inline-block;"> BOF CAR = $17,993 / 7,113 = 253\%$ (BOF/SCR_{BOF}) </div> → Policyholder & Debt investor View
+ HDI V.a.G. (extension from Talanx Group to HDI Group)	1,027	
= Basic Own Funds (HDI) before deductions	19,020	
- Total of non-available own fund items	-5,081	
- Other	-676	
+ Ancillary own funds		
+ Own funds for FCIIF, IORP and entities included	103	
= Total Available Own Funds (AOF)	13,366	<div style="border: 1px solid black; border-radius: 50%; padding: 5px; display: inline-block;"> SII Ratio = $13,336 / 7,826 = 171\%$ </div> → Solvency II View
- Effects from tiering restrictions	0	
= Total Eligible Own Funds (EOF)	13,366	

FCIIF – Financial Credit Institutions and Investment Firms
 IORP – Institutions for Occupational Retirement Provisions

► Figures according to Talanx's standardised terminology

A TERM 2015 – Solvency II Perspective - Tiering

Talanx's Tiering

Comments

- The SCR is based on the partial internal model, i.e. operational risk is captured by standardised methods
- The tiering of Talanx compares well with sector peers. 88% of Own Funds consist of unrestricted Tier 1. The Tier 1 coverage stands at 155%
- Tier 2 mainly consists of subordinated bonds issued by Hannover Finance and Talanx Finance

▶ Talanx is very well placed compared to peers

A TERM 2015 – Sensitivities of BOF CAR

Policyholder & Debt investor View

Estimation of stress impact¹

- Sensitivities are comparable to last year’s results which underlines that the risk profile is largely unchanged
- Sensitivities completely calculated in TERM which improves last year’s results. However, this effect is leveled out by increased exposures

¹ Estimated BOF CAR changes in case of stress scenarios (stress applied on both Basic Own Funds and capital requirement, approximation for loss absorbing capacity of deferred taxes)
² European storm; net after reinstatement premium, single event
³ The credit spreads are calculated as spreads over the swap curve (credit spread stresses include stress on government bonds)
⁴ Interest rate stresses based on non-parallel shifts of the interest rate curve based on EIOPA approach

▶ BOF CAR after stresses comfortably above target

A TERM 2015 – Sensitivities of Solvency II Ratio

Solvency II Perspective

Estimation of stress impact¹

- In the Solvency II Perspective, sensitivities are dampened

¹ Estimated solvency ratio changes in case of stress scenarios (stress applied on both Eligible Own Funds and capital requirement, approximation for loss absorbing capacity of deferred taxes)

² European storm; net after reinstatement premium, single event

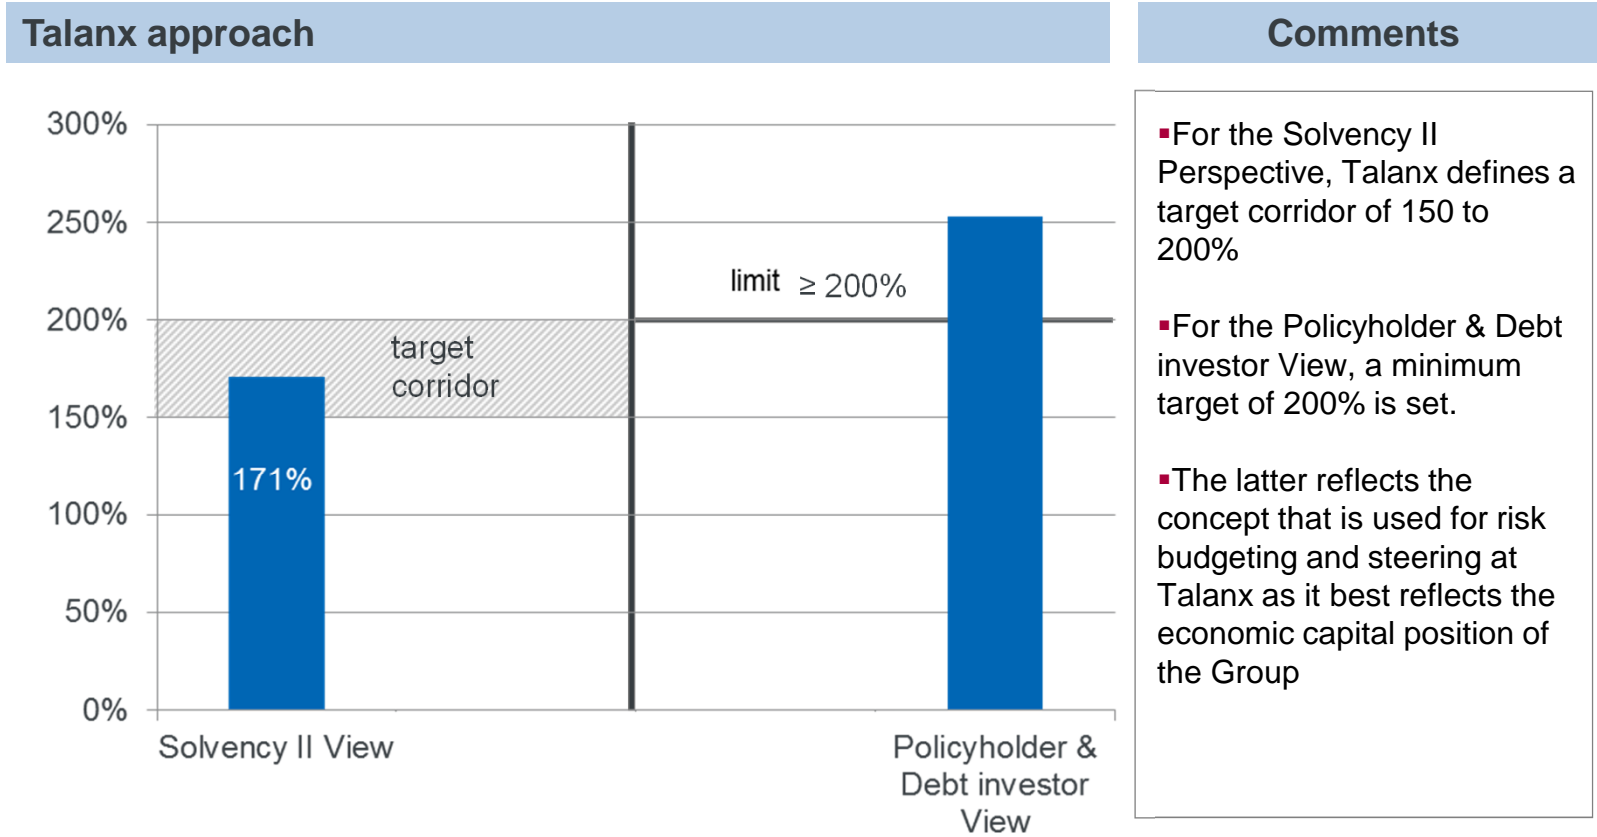

³ The credit spreads are calculated as spreads over the swap curve (credit spread stresses include stress on government bonds)

⁴ Interest rate stresses based on non-parallel shifts of the interest rate curve based on EIOPA approach

Solvency II Ratio after stresses on interest rates, NatCat and equities comfortably above target

A Target CARs

Talanx sets strategic targets for Solvency II Perspective and BOF CAR

MCEV 2015 - Overview

	Primary Insurance						Reinsurance		Talanx		
	Primary D		Primary INT		Total		2015	2014	2015	2014	Change
	2015	2014	2015	2014	2015	2014					
	€m	€m	€m	€m	€m	€m	€m	€m	€m	%	
Net asset value (NAV)	671.9	771.2	336.4	303.3	1,008.3	1,074.5	832.9	857.1	1,841.2	1,931.5	-4.7
Present value of future profits (certainty equivalent)	1,050.0	678.1	146.3	123.3	1,196.3	801.4	1,937.4	1,707.8	3,133.7	2,509.2	24.9
Financial options and guarantees (FOGs)	-592.3	-803.7	-34.5	-20.6	-626.8	-824.3	-2.0	-4.7	-628.7	-829.0	24.2
Cost of residual non-hedgeable risks (CoRNHR)	-317.8	-143.6	-19.1	-18.4	-336.9	-162.0	-654.4	-353.5	-991.3	-515.6	-92.3
Cost of required capital (CoRC)	-8.3	5.9	-8.3	-4.3	-16.6	1.6	-59.4	-58.8	-76.0	-57.1	-33.1
Look through and other adjustments	135.9	136.4	-16.4	-18.1	119.4	118.3	-59.2	-52.6	60.2	65.7	-8.3
Value in-force (VIF)	267.5	-127.0	67.9	62.0	335.4	-65.0	1,162.4	1,238.2	1,497.8	1,173.2	27.7
MCEV after minorities	939.4	644.1	404.3	365.3	1,343.7	1,009.4	1,995.3	2,095.2	3,339.0	3,104.7	7.5

- Increase in MCEV mainly stems from domestic business (Primary D) due to slightly higher yields at year-end and due to some positive impact from assumption changes. The MCEV of the International Primary business (Primary INT) is 10.7% up. For Reinsurance, the MCEV slightly decreased mainly due to the increase in the cost of capital factor for CoRNHR from 4.5% to 6% as required by Solvency II alignment (€ -163.3m)
- MCEV explicitly calculated for major Primary Life Insurance carriers in Germany, Italy and Poland¹
- Covered businesses contribute more than 95% of total IFRS net premiums written by Primary Life Insurance and Life/Health Reinsurance businesses of Talanx Group

¹ HDI-, neue leben-, PB and TARGO Lebensversicherung AG, HDI Pensionskasse AG, HDI Assicurazioni S.p.A. Life and Towarzystwo Ubezpieczen na Zycie WARTA S.A., as well as for the active Life and Health reinsurance businesses of Hannover Re

MCEV improved on Primary Insurance and Group level

A MCEV 2015 - Movement of Embedded Value

Movement of Embedded Value (€m)

► **Primary Insurance benefits from slightly higher yields and from assumption changes – Reinsurance improved its excellent new business value**

VIF = Value In Force
NAV = Net Asset Value

Comments

Primary insurance

- Increase in MCEV mainly due to slightly higher yields and due to assumption changes
- International business developed positively although the operating increase in MCEV was slightly offset by the negative effect of the new Polish tax legislation (impact projected into infinity for € -7.3m)

Reinsurance

- The excellent new business value of Reinsurance is overcompensated by the increase in the cost of capital factor, further model changes as well as experience variances

Significant increase in MCEV for Primary Insurance while MCEV for Reinsurance is slightly down

Comments

- Significant increase in new business value (NBV) of domestic Primary Insurance (2015: €29.9m; 2014: €2.7m) due to a recovery of new business profitability. This results from a somewhat more favourable interest outlook and, in particular, from an improved business mix
- NBV of international Primary Insurance virtually flat (2015: €6.2m, 2014: €6.5m). The increase of NBV in Italy is offset by a decrease in profitability in the Polish insurance market due to the new tax law
- Reinsurance improved its excellent NBV from last year (2015: €261.1m, 2014: €216.5m)

Significant increase in Talanx's new business value due to improvements both on the domestic Primary Insurance as well as on the Reinsurance side

CoRNHR: Cost of capital rate 4.5% ¹	8.5	1.2	6.3		8.2		7.4	

¹ For comparison purposes the calculation with the former cost of capital rate (4.5% - now 6%) in the CoRNHR is shown as a sensitivity.

Comments

- MCEV sensitivities for interest rate changes in Primary Insurance have significantly reduced
- Other sensitivities are more stable compared to the previous year
- For Primary Insurance most sensitivities have decreased in absolute terms
- Higher MCEV levels in domestic business contribute to the overall decline in Primary Insurance sensitivities in percentage terms

Sensitivities on Group level have considerably lowered

A MCEV 2015 - Duration concepts

Durations of technical reserves and bond portfolio, 2015 and 2014

Note: Effective duration bases on the concept of modified duration, i.e. indicates a relative change in portfolio/asset values in terms of interest rate changes. It additionally takes embedded options and guarantees into account. It recognises that surplus funds and taxes act as a buffer that bears parts of potential negative effects from interest rate declines.

¹ Retroactively the 2014 number for the Group has been adjusted from 8.6 to 8.8. The increase results from true-up effects reflecting a more precise calculation of consolidation effects.

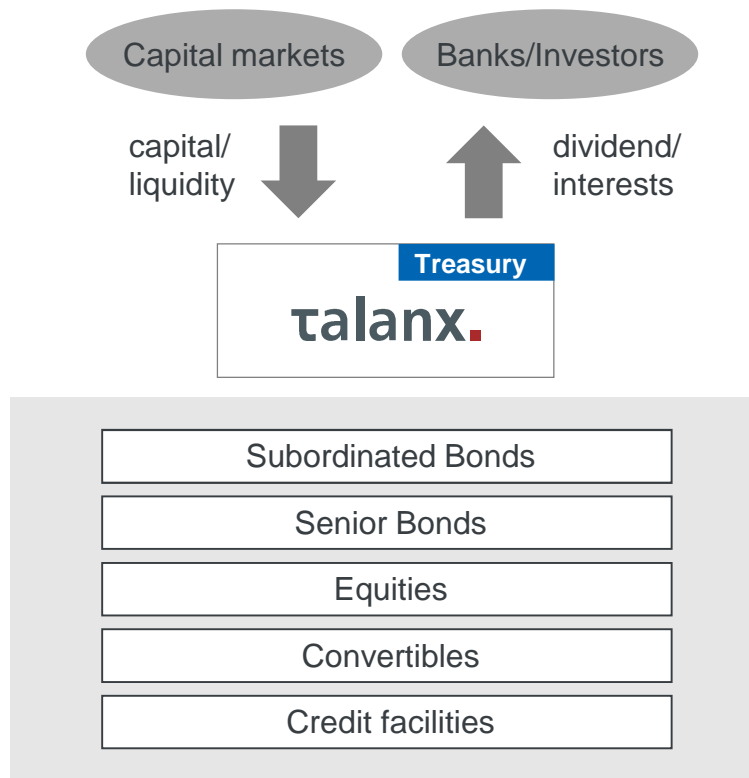

▶ **Duration gaps have somewhat narrowed**

- Debt Financing Overview -

Capital / liquidity management (excluding Hannover Re)

Organisational overview

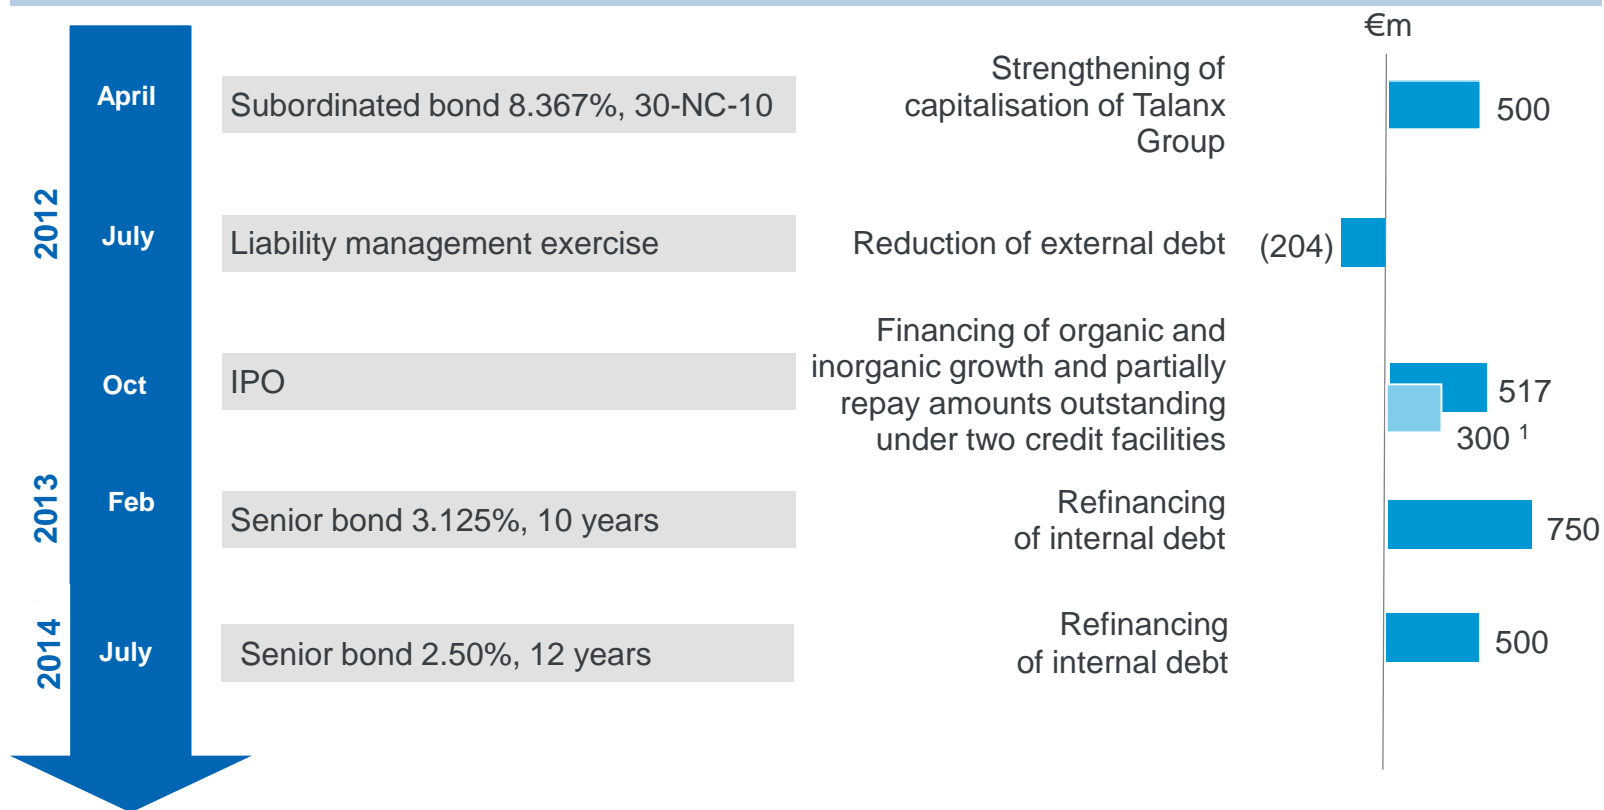

Comments

- One central function for capital and liquidity management
- Secure a comfortable level of liquidity at Talanx AG
- Active capital and liquidity management
- Know-how centre for capital market instruments
- Central steering of all capital markets processes for the group
- Financing of group companies at arm's-length
- Cost reduction as a consequence of concentration of all bank relations in one function and due to benchmark sizes in capital and liquidity funding
- FX / Interest rate hedging
- Investment of Liquidity buffers

► Realisation of efficiency and scale effects through central state-of-the-art treasury function

Market transactions 2012 - 2014

Latest capital market transactions (excluding Hannover Re)

¹ conversion of the Tier 1 Meiji Yasuda bond

Capital market footprint resulting in reasonably efficient market prices as a basis for new issues

Outstanding Talanx hybrid and senior bonds

Talanx Group maturity structure

Outstanding, publicly held volume of hybrid and senior bonds (as of 31/03/2015):

- 2010: €500m (Hannover Finance), callable 2020
- 2012: €500m (Hannover Finance), callable 2022
- 2012: €500m (Talanx Finanz), callable 2022
- 2013: €565m (Talanx AG)
- 2014: €500m (Talanx AG)
- 2014: €500m (Hannover Rück SE), callable 2024

At the moment: No refinancing needs mid-term

Leverage Level

¹ Peer group consist of Allianz, AXA, Baloise, Generali, Mapfre, Munich RE, RSA, VIG, Zurich. Numbers as of FY15
² Defined as the sum of total equity (incl. min.), subordinated debt and senior debt
³ Funded status of defined benefit obligation
⁴ Calculated in % of total capital
⁵ In %-points of total capital

Reasonable, but no excessive use of debt leverage

Disclaimer

This presentation contains forward-looking statements which are based on certain assumptions, expectations and opinions of the management of Talanx AG (the "Company") or cited from third-party sources. These statements are, therefore, subject to certain known or unknown risks and uncertainties. A variety of factors, many of which are beyond the Company's control, affect the Company's business activities, business strategy, results, performance and achievements. Should one or more of these factors or risks or uncertainties materialize, actual results, performance or achievements of the Company may vary materially from those expressed or implied as being expected, anticipated, intended, planned, believed, sought, estimated or projected in the relevant forward-looking statement.

The Company does not guarantee that the assumptions underlying such forward-looking statements are free from errors nor does the Company accept any responsibility for the actual occurrence of the forecasted developments. The Company neither intends, nor assumes any obligation, to update or revise these forward-looking statements in light of developments which differ from those anticipated.

Where any information and statistics are quoted from any external source, such information or statistics should not be interpreted as having been adopted or endorsed by the Company as being accurate. Presentations of the company usually contain supplemental financial measures (e.g., return on investment, return on equity, gross/net combined ratios, solvency ratios) which the Company believes to be useful performance measures but which are not recognised as measures under International Financial Reporting Standards, as adopted by the European Union ("IFRS"). Therefore, such measures should be viewed as supplemental to, but not as substitute for, balance sheet, statement of income or cash flow statement data determined in accordance with IFRS. Since not all companies define such measures in the same way, the respective measures may not be comparable to similarly-titled measures used by other companies. This presentation is dated as of 30 June 2016. Neither the delivery of this presentation nor any further discussions of the Company with any of the recipients shall, under any circumstances, create any implication that there has been no change in the affairs of the Company since such date. This material is being delivered in conjunction with an oral presentation by the Company and should not be taken out of context.
